

WHAT YOU NEED FOR A CLEAN BIKE

- ▶ **Workstand** or something to hold the bike off the ground (a rear car rack works well)
- ▶ **Brushes** (I personally prefer the Finish Line Pro Brush Kit, but there are several different brush sets to choose from)
- ▶ **Bucket** (Home Depot or Lowes both have cheap 5-gallon buckets)
- ▶ **Simple Green**
- ▶ **Degreaser** (every lube company makes one) **Tip:** Don't use anything too strong, it can damage the paint finish on your bike
- ▶ **Access to a garden hose** *(Don't use a pressure washer, the high pressure can push the grease out of the bearings)

*if you do not have access to a hose, a pesticide sprayer can be a great alternative for a quick wash
